

Tests included in H860 CombiBreed Health Package for Dogs

Included Health Conditions Tests

An explanation of these results is accessible in our Online Results Portal, which can be found in your account on the CombiBreed Webshop. Within this portal, you will also discover comprehensive details for each test, including the breed relevance associated with each DNA test.

Code	Test Name
H758	Abortion (embryonic lethality), BTBD17-related
H386	Achromatopsia 2 (Day Blindness) – German Shepherd
H387	Achromatopsia 2 (Day Blindness) – Labrador Retriever
H904	Achromatopsia 3 (Day Blindness)
H918	Achromatopsia 3 (Day Blindness) – Pointer type
H336	Acral Mutilation Syndrome (AMS)
H338	Acute Respiratory Distress Syndrome (ARDS)
H822	Adult Onset Deafness EAOD (4 associated markers) - Border Collie
H404	Alaskan Husky Encephalopathy (AHE)
H389	Alexander Disease
H279	Alpha-Mannosidosis (AMD) – Doberman
H680	Amelogenesis Imperfecta (AI) – (American) Akita
H351	Amelogenesis Imperfecta (AI) – Greyhound
H679	Amelogenesis Imperfecta (AI) – Russel Terrier
H759	Australian Labradoodle dystrophinopathy
H788	Beta-Mannosidosis – German Shepherd
H889	Bilateral Deafness and Vestibular Dysfunction (MYO7A, DINGS2) – Doberman
H493	Bully Whippet – Whippet Double Muscling
H392	Canine Scott Syndrome (CSS)
H807	Cardiomyopathy and juvenile mortality (CJM) – Belgian Shepherd
H663	Centronuclear Myopathy (CNM) - Border Collie
H749	Centronuclear Myopathy (CNM) - Labrador Retriever
H128	Cerebellar Abiotrophy (CA) – Kelpie
H156	Cerebellar Ataxia (CA1, RALGAP1-related) – Belgian Shepherd
H657	Cerebellar Ataxia (SDCA1 + SDCA2) – Shepherd Type
H411	Cerebellar Ataxia – Finnish Hound
H284	Cerebellar Degeneration-Myositis Complex (CDMC) – NSDTR
H992	Cerebellar Hypoplasia (CH) – White Swiss Shepherd
H356	Chondrodysplasia (Dwarfism)
H095	Chondrodystrophy (CDDY with IVDD Risk) and Chondrodysplasia (CDPA)
H709	CLAD (Canine Leukocyte Adhesion Deficiency) Type I – Irish Setter
H484	CLAD (Canine Leukocyte Adhesion Deficiency) Type III – German Shepherd

Code	Test Name
H344	Cleft Lip / Palate and Syndactyly (CLPS)
H871	CMR1 (Canine Multifocal Retinopathy)
H730	CMR2 (Canine Multifocal Retinopathy)
H300	CMR3 (Canine Multifocal Retinopathy)
H950	CNS Atrophy with Cerebellar Ataxia (CACA) – Belgian Shepherd
H705	Collie Eye Anomaly CEA, CH
H412	Complement 3 Deficiency (C3) – Brittany Spaniel
H773	Congenital Cornification Disorder (ILVEN) - Chihuahua
H625	Congenital Cornification Disorder (ILVEN) – Labrador Retriever
H446	Congenital Dyshormonogenic Hypothyroidism with Goiter (CDH)
H727	Congenital Eye Malformation (CEM) – Golden Retriever
H488	Congenital Hypothyroidism with Goiter (CHG) – Rat and Toy Fox Terrier
H416	Congenital Hypothyroidism with Goiter (CHG) – Spanish Water Dog
H485	Congenital Hypothyroidism with Goiter (CHG) – Tenterfield Terrier
H694	Congenital Methemoglobinemia – All breeds
H908	Congenital Methemoglobinemia – German Spitz (Pomeranian)
H274	Congenital Mirror Movement Disorder 1 (CMM1, EFN3-related)
H967	Congenital Muscular Dystrophy (CMD) – Italian Greyhound
H626	Congenital Myasthenic Syndrome (CMS) - Jack Russell Terrier
H339	Congenital Myasthenic Syndrome (CMS) - Labrador Retriever
H425	Congenital Myasthenic Syndrome (CMS) - Old Danish Pointer
H391	Congenital Myasthenic Syndrome (CMS) – Heiderterrier
H728	Congenital Stationary Night Blindness (CSNB) - Briard
H814	Congenital Stationary Night Blindness (CSNB) – Beagle
H825	Copper Toxicosis (Accumulating Variant, ATP7B-related)
H701	Copper Toxicosis (Accumulating Variant, COMMD1 – related) – Bedlington Terrier
H824	Copper Toxicosis (Modifier, ATP7A-related)
H318	Cortical Cerebellar Abiotrophy (NCCD) – Vizsla
H312	Craniomandibular Osteopathy (CMO) - Terrier Type
H901	Craniomandibular Osteopathy (CMO) – Basset Hound
H643	Cystinuria (Type I – A) – Labrador Retriever
H703	Cystinuria (Type I – A) – Newfoundland
H644	Cystinuria (Type II – A) – Australian Cattle Dog
H645	Cystinuria (type II – B) – Miniature Pinscher
H929	Cystinuria (Type III) – Bulldog Type
H355	Dandy-Walker-Like Malformation (DWLM) / Cerebellar Hypoplasia (CH) – Eurasier
H308	Degenerative Myelopathy Exon 1 (DM Exon 1) – Bernese Mountain Dog

Code	Test Name
H673	Degenerative Myelopathy Exon 2 (DM Exon 2)
H327	Dental Hypomineralization
H974	Dental-Skeletal-Retinal Anomaly (DSRA)
H952	Diffuse Cystic Renal Dysplasia and Hepatic Fibrosis
H865	Dilated Cardiomyopathy (DCM, PLN-related) – Welsh Springer Spaniel
H459	Dilated Cardiomyopathy (DCM, RBM20-related) – Schnauzer
H434	Dilated Cardiomyopathy (DCM1, PDK4-related) – Doberman
H635	Dilated Cardiomyopathy (DCM2, TTN-related) – Doberman
H880	Dilated Cardiomyopathy (DCM3) – Doberman
H881	Dilated Cardiomyopathy (DCM4) – Doberman
H876	Disproportionate Dwarfism – Dogo Argentino
H913	Dry Eye Curly Coat Syndrome (CCS, DE-CC)
H283	Dyserythropoietic Anemia and Myopathy Syndrome (DAMS) – Labrador Retriever
H497	Dystrophic Epidermolysis Bullosa (RDEB) – Golden Retriever
H914	Early Onset Progressive Polyneuropathy (EOPP)
H756	Early-onset adult deafness (Rhodesian Ridgeback)
H375	Ectodermal Dysplasia / Skin Fragility Syndrome – Chesapeake Bay Retriever Type
H689	Ehlers-Danlos Syndrome (EDS, COL5A1-related) – Dog
H686	Ehlers-Danlos Syndrome Type 1 – Labrador Retriever
H732	Ehlers-Danlos Syndrome Type 7 – Doberman
H687	Elliptocytosis
H363	Epidermolytic Hyperkeratosis (EHK) and Ichthyosis – Norfolk Terrier
H672	Exercise Induced Collapse, EIC
H467	Exercise Induced Metabolic Myopathy
H435	Factor VII deficiency
H713	Familial Thyroid Follicular Cell Carcinoma I & II
H863	Fanconi syndrome - FS
H869	Fecundity
H676	FN, Familial Nephropathy – (English) Cocker Spaniel
H633	FN, Familial Nephropathy – English Springer Spaniel
H736	Fucosidosis
H452	Gangliosidosis (GM1) – Portuguese Water Dog
H702	Gangliosidosis (GM1) – Shiba Inu
H361	Gangliosidosis (GM2 Type I) – Japanese Chin
H490	Gangliosidosis (GM2 Type II) – Poodle Type
H440	Glanzmann's Thrombasthenia (GT) 1 – Dog
H737	Globoid Cell Leukodystrophy (GCL, Krabbes disease) – Terrier Type

Code	Test Name
H188	Glycogen Storage Disease Ia (GSD1a) – German Pinscher
H415	Glycogen Storage Disease Ia (GSD1a) – Maltese
H347	Glycogen Storage Disease II (GSD2, Pompe) – Dog
H813	Glycogen Storage Disease IIIa (GSD IIIa) – Curly Coated Retriever
H717	Glycogen Storage Disease VII (GSD7) / Phosphofructokinase Deficiency (PFK Def)
H397	Glycogen Storage Disease VII (GSD7) – Deutscher Wachtelhund
H472	Goniodysgenesis and Glaucoma (GG)
H752	Gray Collie Syndrome (Cyclic Neutropenia)
H491	Haemophilia A (HEMA-1) – German Shepherd
H780	Haemophilia A (HEMA-2) – German Shepherd
H877	Haemophilia A - Boxer
H121	Haemophilia A – Border Collie
H286	Haemophilia A – Labrador Retriever
H953	Haemophilia A – Old English Sheepdog
H931	Haemophilia A – Rhodesian Ridgeback
H954	Haemophilia B – Hovawart
H976	Haemophilia B – Lhasa Apso
H977	Haemophilia B – Newfoundland
H607	Haemophilia B – Rhodesian Ridgeback
H975	Hereditary Ataxia (HACE-related) – Norwegian Elkhound
H905	Hereditary Ataxia (KCNP4-related) – Norwegian Buhund
H653	Hereditary Ataxia (RAB24-related) – Old English Sheepdog and Gordon Setter
H781	Hereditary Ataxia (SCA) - Australian Shepherd
H809	Hereditary Cataract (HC, HSF4-1)
H699	Hereditary Cataract (HC, HSF4-2)
H182	Hereditary Deafness (EAOD) – Beauceron
H777	Hereditary Footpad Hyperkeratosis (DSG1-related) – Rottweiler
H492	Hereditary Footpad Hyperkeratosis (FAM83G-related)
H460	Hereditary Nasal Parakeratosis (HNPK) – Greyhound
H988	Hereditary Necrotizing Myelopathy (HNM)
H370	Hereditary Nephritis (HN) – Samoyed
H811	Hyperuricemia (HUU, SLC2A9-related)
H364	Hypocatalasia (CAT)
H432	Hypomyelination / Shaking Puppy Syndrome (SPS) - English Springer Spaniel
H365	Hypomyelination / Shaking Puppy Syndrome (SPS) - Weimaraner
H636	Hypophosphatasia
H277	Hyposegmentation of Granulocytes (HG) – Australian Shepherd

Code	Test Name
H153	Ichthyosis - Jack Russell Terrier Type
H501	Ichthyosis - Poodle Type
H858	Ichthyosis type 1 & 2 - Golden Retriever
H378	Ichthyosis – American Bulldog Type
H384	Ichthyosis – German Shepherd
H304	Ichthyosis – Great Dane
H867	Inflammatory Myopathy (Myositis)
H726	Inflammatory Pulmonary Disease
H368	Inherited Myopathy of Great Danes (IMGD) / Centronuclear Myopathy (CNM, HMLR)
H366	Intestinal Cobalamin Malabsorption (ICM, IGS) – Beagle
H367	Intestinal Cobalamin Malabsorption (ICM, IGS) – Border Collie
H955	Intestinal Cobalamin Malabsorption (ICM, IGS) – Komondor
H718	Junctional Epidermolysis Bullosa (JEB, LAMA3-related) – Australian Cattle Dog
H778	Junctional Epidermolysis Bullosa (JEB, LAMB3-related) – Australian Shepherd
H654	Juvenile Addison's Disease (JADD)
H154	Juvenile Cataract - Wirehaired Pointing Griffon
H991	Juvenile Dilated Cardiomyopathy (JDCM) – Manchester Terrier
H486	Juvenile Epilepsy (JE/BFJE) – Lagotto Romagnolo
H329	Juvenile Laryngeal Paralysis Polyneuropathy (JLPP)
H335	Juvenile Myoclonic Epilepsy (JME) – Rhodesian Ridgeback
H724	L-2-Hydroxyglutaric Aciduria (L2HGA) – Staffordshire Bull Terrier
H627	Lagotto Storage Disease (LSD)
H641	Laryngeal Paralysis (LP) – Bull Terrier Type
H693	Laryngeal Paralysis and polyneuropathy (LPPN3, CNTNAP1-related)
H328	Late Onset Ataxia (LOA)
H463	Lethal Acrodermatitis (LAD)
H961	Lethal Lung Disease (LAMP3) – Airedale Terrier
H708	Leukodystrophy (CYTB-related)
H870	Leukodystrophy (LEP, TSEN54-related) – Schnauzer
H395	Limb-Girdle Muscular Dystrophy (LGMD) – Boston Terrier 1
H816	Limb-Girdle Muscular Dystrophy 2D (LGMD2D) – Dachshund
H500	Long QT Syndrome
H864	Lundehund syndrome - LS
H272	Lysosomal Storage Disease (LSD) – Dalmatian
H340	Lysosomal Storage Disease (LSD) – Weimaraner
H879	Macrothrombocytopenia (MTC) – Cairn and Norfolk Terrier
H441	Macrothrombocytopenia (MTC) – Cavalier King Charles Spaniel

Code	Test Name
H317	Macular Corneal Dystrophy (MCD)
H746	Malignant Hyperthermia (MH) – Dog
H882	May-Hegglin Anomaly (MHA) - Pug
H755	MCAD Deficiency – Cavalier King Charles Spaniel
H629	MDR1 Multi Drug Resistance - Dog
H786	Metabolizer of a Cognitive Enhancer
H631	Microphtalmia (RBP4-related) – Irish Soft Coated Wheaten Terrier
H285	Mitochondrial Fission Encephalopathy (MFE) – Bullmastiff
H418	Mucopolysaccharidosis IIIa (MPS3a) - Dachshund
H886	Mucopolysaccharidosis VI (MPS6) – Miniature Pinscher
H451	Mucopolysaccharidosis VII (MPS7) – Brazilian Terrier
H748	Mucopolysaccharidosis VII (MPS7) – German Shepherd
H503	Multicocular Defect (MOD) - Old English Sheepdog
H969	Muscular Dystrophy (MD) - Landseer
H155	Muscular Dystrophy (MD) – American Staffordshire Terrier
H912	Muscular Dystrophy (MD) – Border Collie
H359	Muscular Dystrophy (MD) – Cavalier King Charles Spaniel
H419	Muscular Dystrophy (MD) – Corgi
H122	Muscular Dystrophy (MD) – French Bulldog
H747	Muscular Dystrophy (MD) – Golden Retriever
H735	Muscular Dystrophy (MD) – Labrador Retriever
H688	Muscular Dystrophy-Dystroglycanopathy (MDD) – Labrador Retriever
H424	Musladin-Lueke Syndroom (MLS)
H282	Mycobacterium Avium Complex (MAC) – Schnauzer
H970	Myeloperoxidase Deficiency
H498	Myotonia Congenita – Australian Cattle Dog and Border Collie
H127	Myotonia Congenita – French Bulldog
H690	Myotonia Congenita – Labrador Retriever
H738	Myotonia Congenita – Schnauzer
H707	Narcolepsy – Dachshund
H697	Narcolepsy – Doberman
H698	Narcolepsy – Labrador Retriever
H957	Nemaline Myopathy – American Bulldog
H410	Neonatal Cerebellar Ataxia – Coton de Tulear and Havanese
H413	Neonatal Cortical Cerebellar Abiotrophy (NCCD) – Beagle
H812	Neonatal Encephalopathy (NEWS)
H289	Neuroaxonal Dystrophy (NAD) - Miniature American Shepherd

Code	Test Name
H890	Neuroaxonal Dystrophy (NAD) - Papillon
H888	Neuroaxonal Dystrophy (NAD) - Rottweiler
H428	Neuroaxonal Dystrophy (NAD) - Schnauzer and Beagle
H462	Neuroaxonal Dystrophy (NAD) - Spanish Water Dog
H716	Neurological defects with dilute coat colour
H494	Neuronal Ceroid Lipofuscinosis 1 (NCL1) - Dachshund
H429	Neuronal Ceroid Lipofuscinosis 10 (NCL10) - American Bulldog
H987	Neuronal Ceroid Lipofuscinosis 12 (NCL12) - Australian Cattle Dog
H499	Neuronal Ceroid Lipofuscinosis 2 (NCL2) - Dachshund
H804	Neuronal Ceroid Lipofuscinosis 4A (NCL4A) - Cerebellar Ataxia
H721	Neuronal Ceroid Lipofuscinosis 5 (NCL5)
H380	Neuronal Ceroid Lipofuscinosis 5 (NCL5) - Golden Retriever
H330	Neuronal Ceroid Lipofuscinosis 6 (NCL6) - Australian Shepherd
H126	Neuronal Ceroid Lipofuscinosis 6 (NCL6) - Schapendoes
H978	Neuronal Ceroid Lipofuscinosis 7 (NCL7)
H125	Neuronal Ceroid Lipofuscinosis 8 (NCL8) - Alpine Dachsbracke
H337	Neuronal Ceroid Lipofuscinosis 8 (NCL8) - Australian Shepherd Type
H652	Neuronal Ceroid Lipofuscinosis 8 (NCL8) - English Setter
H958	Neuronal Ceroid Lipofuscinosis 8 (NCL8) - Saluki
H965	Nonsyndromic Hearing Loss - Rottweiler
H895	Obesity (POMC-related)
H982	Oculoskeletal Dysplasia (OSD) / Retinal Dysplasia (RD) - Northern Inuit Dog
H794	Oculoskeletal Dysplasia 1 (OSD1) / Retinal Dysplasia (RD) - Labrador Retriever
H898	Osteochondrodysplasia (OC)
H903	Osteochondromatosis
H430	Osteogenesis Imperfecta (OI) - Beagle
H964	Osteogenesis Imperfecta (OI) - Chow Chow
H431	Osteogenesis Imperfecta (OI) - Dachshund
H381	Osteogenesis Imperfecta (OI) - Golden Retriever
H450	P2RY12 Receptor Platelet Disorder
H634	Paroxysmal Dyskinesia (PD) - Irish Soft Coated Wheaten Terrier
H995	Paroxysmal Exercise-Induced Dyskinesia (PED) - Shetland Sheepdog
H963	Persistent Mullerian Duct Syndrome (PMDS)
H951	Pituitary Dwarfism - Karelian Bear Dog
H872	Pituitary Dwarfism - Shepherd Type
H130	Polioencephalopathy (PE) - Eurasier
H509	Polycystic Kidney Disease (PKD) - Bull Terrier

Code	Test Name
H495	Polyneuropathy (AMPN) – Alaskan Malamute
H379	Polyneuropathy (LPN1)
H342	Polyneuropathy (LPN2) – Leonberger
H439	Prekallikrein Deficiency (KLK)
H968	Primary Ciliary Dyskinesia (PCD) – Australian Shepherd
H414	Primary Ciliary Dyskinesia (PCD) – Old English Sheepdog
H374	Primary hyperoxaluria
H465	Primary Immunodeficiency Type 2 (PIPS2, CARMIL2-related) – CKCS
H849	Primary Lens Luxation - PLL
H457	Primary Open Angle Glaucoma (POAG) / Primary Lens Luxation (PLL) – Shar-Pei
H496	Primary Open Angle Glaucoma (POAG) – Beagle
H383	Primary Open Angle Glaucoma (POAG) – Norwegian Elkhound
H371	Progressive Retinal Atrophy (Bas-PRA, SAG-related) – Basenji
H866	Progressive Retinal Atrophy (BBS2-PRA) – Shetland Sheepdog
H394	Progressive Retinal Atrophy (BBS4-PRA) – Hungarian Puli
H390	Progressive Retinal Atrophy (CNGA1-PRA) – Shetland Sheepdog
H372	Progressive Retinal Atrophy (crd-PRA, NPHP4-related) – Dachshund
H357	Progressive Retinal Atrophy (crd1-PRA) – American Staffordshire Terrier
H358	Progressive Retinal Atrophy (crd2-PRA) – American Pit Bull Terrier
H766	Progressive Retinal Atrophy (crd4-PRA/cord1)
H739	Progressive Retinal Atrophy (D-PRA, Dominant PRA) – Mastiff
H382	Progressive Retinal Atrophy (erd-PRA) - Norwegian Elkhound
H915	Progressive Retinal Atrophy (g-PRA) – Schapendoes
H868	Progressive Retinal Atrophy (GR-PRA1)
H473	Progressive Retinal Atrophy (GR-PRA2)
H962	Progressive Retinal Atrophy (IFT122-PRA) – Lapponian Herder
H298	Progressive Retinal Atrophy (JPH2 – PRA) – Shih-Tzu
H682	Progressive Retinal Atrophy (PRA, NECAP1-related) – Schnauzer
H808	Progressive Retinal Atrophy (PRA1 Type B, HIVEP3-related) – Schnauzer
H373	Progressive Retinal Atrophy (PRA3) – Tibetan Type
H704	Progressive Retinal Atrophy (prcd-PRA)
H768	Progressive Retinal Atrophy (rcd1-PRA) – Irish Setter
H769	Progressive Retinal Atrophy (rcd1a-PRA) – Sloughi
H770	Progressive Retinal Atrophy (rcd3-PRA)
H511	Progressive Retinal Atrophy (rcd4-PRA)
H772	Progressive Retinal Atrophy (XL-PRA, X-Linked)
H878	Progressive Retinal Atrophy Early Onset (eo-PRA) – Spanish Water Dog

Code	Test Name
H740	Pyruvate Dehydrogenase Phosphatase Deficiency (PDP1)
H445	Pyruvate Kinase Deficiency (PKDef) – Basenji
H455	Pyruvate Kinase Deficiency (PKDef) – Beagle
H741	Pyruvate Kinase Deficiency (PKDef) – Labrador Retriever
H454	Pyruvate Kinase Deficiency (PKDef) – Pug
H971	Pyruvate Kinase Deficiency (PKDef) – West Highland White Terrier
H489	Renal Cystadenocarcinoma and Nodular Dermatofibrosis (RCND)
H754	Resistance to Phenobarbital Therapy – Border Collie
H725	Retinal Dysplasia
H960	Saluki Encephalopathy (SE)
H695	Sensory Neuropathy - All breeds
H423	Severe Combined Immunodeficiency (SCID, PRKDC-related) – Jack Russel Terrier
H456	Severe Combined Immunodeficiency (SCID, RAG1-related) – Wetterhoun
H891	Shar-Pei Fever (SPAID)
H990	Skeletal Dysplasia (SD3) – Vizsla
H510	Skeletal Dysplasia 2 (SD2) – Labrador Retriever
H683	Spinocerebellar Ataxia (SCA) – Alpine Dachsbracke
H303	Spinocerebellar Ataxia (SCA) – Terrier Type
H803	Spondylocostal Dysostosis (Comma Defect)
H907	Stargardt disease 1
H594	Startle Disease – Miniature American Shepherd
H448	Thrombopathia – American Eskimo Dog
H442	Thrombopathia – Basset Hound
H449	Thrombopathia – Landseer
H787	Trapped Neutrophil Syndrome (TNS)
H911	Unilateral Deafness and Vestibular Dysfunction (PTPRQ, DINGS1) – Doberman
H932	Ventricular Arrhythmias and Sudden Death
H433	Vitamin D-Resistant Rickets (VDR) – German Spitz (Pomeranian)
H677	Von Willebrand Disease Type 1
H345	Von Willebrand Disease Type 2-2
H642	Von Willebrand Disease Type 3 – Kooikerhondje
H744	Von Willebrand Disease Type 3 – Scottish Terrier
H696	Warburg Micro Syndrome 1 (WARBM1)
H385	X-Linked Ectodermal Dysplasia (XHED) – Shepherd Type
H859	X-linked Myotubular Myopathy (XLMTM) – Boykin Spaniel
H427	X-linked Myotubular Myopathy (XLMTM) – Labrador Retriever
H776	X-linked Myotubular Myopathy (XLMTM) – Rottweiler

Code	Test Name
H745	X-Linked Severe Combined Immunodeficiency Disease (XSCID) – Cardigan Welsh Corgi
H671	Xanthinuria, type 1 - All breeds
H789	Xanthinuria, type 2 – Manchester Terrier

Other Tests

Genetic traits are often influenced by other genetic traits and environmental factors. For in-depth insight into these genetic traits you can visit the online portal.

Code	Test Name
H916	Coefficient of Inbreeding
H917	Heterozygosity

Trait Characteristics

Coat colour and patterns are caused by the interaction of several genetic traits. For in-depth insights into these genetic traits, you can visit the online portal with test results or access the knowledgebase via the CombiBreed webshop.

Coat Colours

Code	Test Name
H857	Coat Colour B-Locus (Brown, 4 variants) – Dog
H887	Coat Colour Cocoa (HPS3-related)
H847	Coat Colour D-Locus 1 - Dog
H461	Coat Colour D-Locus 2 - Dog
H897	Coat Colour D-Locus 3 - Dog
H791	Coat Colour E-Locus (6 variants) - Dog
H821	Coat Colour I-Locus (Intensity)
H819	Coat Colour K-Locus (Dominant Black)
H751	Coat Colour Oculocutaneous Albinism (OCA1)
H894	Coat Colour Oculocutaneous Albinism (OCA2)
H715	Coat Colour Oculocutaneous Albinism (OCA4-1)
H393	Coat Colour Oculocutaneous Albinism (OCA4-3)

Coat Patterns

Code	Test Name
H820	Coat Colour A-Locus (Agouti) - Dog
H316	Coat Colour H-Locus (Harlequin)
H630	Coat Colour Merle
H354	Coat Colour Panda White Spotting
H763	Coat Colour Roan - Ticked
H326	Coat Colour S-Locus (Piebald)
H910	Coat Colour Saddle tan vs black-and-tan IMPROVED

Other Coat Features

Code	Test Name
H292	Body Size (5 variants) – Dog
H299	Coat Type SD-Locus (Shedding MC5R)
H921	Curly Coat (c1) – Dog
H681	Curly Coat (c2) – Dog
H667	Hair Length (5 variants) – Dog
H848	Improper Coat/Furnishings
H972	Recessive Hypotrichosis (Hairlessness) – American Hairless Terrier
H973	Recessive Hypotrichosis (Hairlessness) – Scottish Deerhound
H487	Tail Length (Brachyury, T-Locus, Natural Bobtail) – Dog

Genetic Information (Example)

H917 - Diversity/Heterozygosity

Heterozygosity in dogs refers to the genetic situation where a dog inherits two different alleles (gene variants) for a specific trait or gene locus from its parents. This genetic diversity contributes to the variation seen in physical traits, behaviors, and health among individual dogs and different breeds. Maintaining a certain level of heterozygosity is important in breeding programs to avoid an excessive accumulation of harmful recessive traits and promote overall genetic health within dog populations.

*In case there is an insufficient amount of animals for your specific breed, only a comparison with all breeds will be shown.

H916 - Coefficient of Inbreeding

The Coefficient of Inbreeding (COI) in dogs is a numerical measure that quantifies the probability of two copies of the same gene being inherited from a common ancestor. In simpler terms, it reflects how closely related the parents of a dog are within their family tree. A higher COI indicates a higher likelihood of the dog inheriting identical genes from both parents, which can lead to an increased risk of passing on genetic disorders or health issues.

*In case there is an insufficient amount of animals for your specific breed, only a comparison with all breeds will be shown.
